Laminate flooring Meister Design. laminate

LL 250

	Tests	DIN/EN standard	Laminate flooring MeisterDesign. laminate LL 250
General data on pi	roduct composition		
	Type of covering:		Flooring panel with top layer made from specially-resined decor paper
	Total thickness:	<u> </u>	approx. 10 mm
	Effective measurement (length × width):		2 052 × 248 mm
	Product structure:		a. Overlay b. Antistatic decorative paper c. HDF base board (approx. 890 kg/m³ ± 3%) d. AquaStop edge impregnation e. Backing
Technical data			
	Locking method:		5G™ Dry™
	Wear class:	EN 13 329	23/32
7	Electrical behaviour:	EN 1815	In walk-over test according to DIN EN 1815 at climate of 23° C/25% relative humidity, the personal voltage was Up < 2 kV. The laminate flooring can be described in accordance with EN 14041:2004 as "antistatic floor covering".
	Wear resistance:	EN 13 329 (appendix E)	AC4 (= IP ≥ 4 000 cycles)
ANTI- BACTERIAL SURFACE	Antibacterial surface property:	ISO 22196	Effectiveness of the antibacterial property against Staphylococcus aureus ATCC 6538P and Escherichia coli ATCC 8739: "strong", value of the antibacterial effect $A \ge 3$.
• 🐧	Impact resistance (small ball):	EN 17368	≥ 35 mm
	Impact resistance (big ball):	EN 13 329 (appendix C)	≥ 600 mm
	Stain resistance:	EN 438-2	Group 1: grade 5 Group 2: grade 5 Group 3: grade 4-5
7	Colour fastness:	EN ISO 4892-2	≥ stage 4 on the grey scale
C _H -s1	Fire behaviour:	EN 13 501	C _{fl} -s1 (hardly flammable)
DS	Slip resistance:	EN 14 041 / 13 893	DS
	Scratch resistance:	EN 438-2	Grade 4
	Water resistance:	ISO 4760	Requirements fulfilled (24 hours)

01/24 1/2

"E1	Formaldehyde emissions (E1 = 0.1 ppm):	EN 717-1	≤ 0.05 ppm
[®] DL PCP	Content of Pentachlorophenol:	EN 14 041 / 14 823	< 5 ppm
	Indent after constant load:	EN ISO 24 343-1	≤ 0.05 mm
	Castor resistance:	EN ISO 4918	no visible changes or damage with soft, standard castors (type W)
→	Behaviour on simulation of shifting furniture foot:	EN ISO 16581	Foot type 0: no visible damage
	Underfloor heating:		Suitable for hot-water underfloor heating Electrical underfloor heating is generally suitable when it is built into the floor screed or the concrete layer and thus does not lie on the concrete layer as foil heat ting. The heating elements/pipes/wires must lie across the entire area and not just be partly present. If the area is only partially heated, the floor covering must have expansion joints (system profile strips). The maximum permitted surface temperature is 29° C. Standard foil heating systems are generally not recommen- ded. One exception is self-regulating heating systems which maintain the 29° C surface temperature.
	Underfloor cooling:		A separate leaflet is available for laying on cooled floor constructions.
	Heat transfer resistance:	EN 12 667	0.071 (m ² K)/W
	Thermal conductivity:	EN 12 667	0.136 W/(m*K)
	Footfall noise reduction:	DIN EN ISO 10140-3	with MEISTER-Silence 15 DB: 16 dB
	Antislip:	DIN EN 16165 (appendix B) / DIN 51130	on request; structure-dependent: - / R 9
olerances	Diabata and a state a law and	EN 10 000	Assessed to the second
	Right-angle of the elements:	EN 13 329 EN 13 329	target values met
	Determination of edge straightness: Surface flushness:	EN 13 329	target values met
	Joint opening between the	EN 13 329	target values met target values met
	elements:	LIV 10 023	talget values met
ieneral data on	environment, installation and care		
	Blue Angel:	RAL-UZ 176	awarded
	Disposal:		Residual pieces can be disposed of in household refuse (e.g. thermal treatment) Dispose large quantities according to municipal provisions (e.g. recycling centres An energetic utilization in authorized plants is recommended.
	Cleaning and care:		Cleaning after completion of construction work/day-to-day cleaning: Dr. Schutz Laminate Cleaner Special cleaning: Dr. Schutz-Elatex Stain Remover
	Areas of application:		The flooring is suitable for all living areas as well as for commercial areas with nor mal wear. e. g. offices, waiting rooms, boutiques etc. Special requirements apply t treatment rooms and medical practices.
600	AquaSafe system:		The laminate floor is water-resistant (24 hours protection against standing water as it has the AquaSafe+ system's comprehensive protection against humidity. Ca be installed in humid rooms like e.g. bathrooms. This does not include outdoor areas and wet rooms, e.g. saunas, shower cubicles, steam rooms and rooms with a floor drain.
	Preconditions for installation:	DIN 18 365	The substrates must be ready for laying on according to the generally recognised rules of the trade, taking into account VOB (German construction contract procedures), part C DIN 18 365 "Floor covering work". The substrate must be dry (in the case of mineral substrates max. 2 % or with underfloor heating 1.8 %, with anhydrite screed max. 0.5 % or with underfloor heating 0.3 % residual moisture – measured with CM devices), even, firm and clean. Additionally, any unevenness of 3 mm / per initial metre and 2 mm per further metre must be evened out according to DIN 18 202, table 3, line 4. The installation instructions provided with the product must be observed.
